

pH ELECTRODE CONIC

Type: pHc

Description

pHc Electrode are used as sensors for potentiometric determination of H^+ , respective H_3O^+ activity, expressed in pH units. Conic electrodes are applicable to all commonly used measuring apparatus with inner resistance of 10^9 or more. Electrode is designed for measurements with TC4, TC5 and TC6 glass cell.

Physical Parameters

Dimensions:

Length: 57 mm
Diameter: 12 mm
Weight: 100 gms

Ordering Information

- The order is specified by whole product code
- Minimum order quantity - 1 pHc electrode
- Delivery time for standard electrode is 4 weeks from receipt of order
- Delivery time for non-standard electrode depends on final technical specification of order

Example of Order - 10 pieces - pHc

Connecting cable

Look at the cables catalog, and choose the one you need.
